

Epygi Technologies Stylizes Moda Studio and Mostaza's Communication with Increased Efficiency

Both Moda Studio and Mostaza are leading companies in the fashion industry that needed a reliable communication solution. Currently, the two companies are headquartered in the same building, which also includes their showrooms and retail stores. However, they also have offices in remote locations. While both companies are independent, they shared a common need for a more efficient line of communication between their multiple offices. As growing

companies, an increased number of employees and distribution called for increased office productivity.

Dressing Up the System

Before Epygi Technologies, Moda Studio and Mostaza were using a digital Nortel PBX. When their old system wasn't cutting it, they decided to search for a new solution. With multiple office locations and employees traveling, Moda Studio and Mostaza realized

“We recommended Epygi both for their support of remote extensions and for their affordable, high-tech VoIP solutions,” explains David Kupersmith, CEO of TEKDATA.

they both needed a way to connect all the moving parts of their companies. After sewing together their resources, they installed a QuadroM32x with multiple Quadro FXS 26 Gateways.

Slashing the Competition

The two companies began their search for an updated IP communication system. Moda Studio and Mostaza considered systems from Avaya, Cisco, Zycoo and Asterisk. However, it was Epygi’s open standards, flexibility and easy installation that won out over other solutions. With Epygi, the companies were able to purchase the latest and greatest in the VoIP industry at an affordable price. Epygi’s reliability and feature-rich systems maximize resources while staying within budget.

Fashionable Features

After installing the QuadroM32x and integrating all their offices, Moda Studio and Mostaza decided to add two of Epygi’s licensable features, Barge-In and Call Recording, to their system. Barge-In allows for supervisors to listen in on and join phone calls, while Call Recording records and stores calls either locally or on an internal or external server. In addition to accessing these features, traveling employees were also able to take advantage of the softphone-compliant system that allows remote workers to turn their laptops into remote extensions off the main system.

“With many employees doing business throughout Latin America, both Moda Studio and Mostaza needed a way for their remote employees to work efficiently. We recommended Epygi both for their support of remote extensions and for their affordable,

high-tech VoIP solutions,” explains David Kupersmith, CEO of TEKDATA.

About TEKDATA

TEKDATA is a major supplier of telecommunication, security and networking products in the Central America region. They pride themselves on not just meeting but exceeding the standards of the telecommunication industry. With their lifetime warranty, they ensure ultimate product performance for their customers and continue to enhance the communication experience.
